It is based on methods and best practices, arised from Prince 2, PMPBOK, Scrum master and agile projects, such as BPR, Stakeholder Management, Change management, Social Psychology and Archetypal Communication .

### **B1-AKT THE PEAK GLOBAL BODY OF SUSTAINABLE SOLUTIONS**

B1-AKT is the peak global body for the development of sustainable solutions to the effects of complexity. These solutions have application across all industry sectors; corporate, NGO and government initiatives globally.

At B1-AKT we utilize global networks to develop and sustain effective relationships between CPM thought leaders, practitioners, subject matter experts, business and government within B1-AKT 's interconnected networks and the wider complex project management community globally.

We function like a hub, drawing together the capabilities of its Associate Partner Network of research institutions and subject matter experts to develop and deliver customised, systemic, broad based solutions at organizational, program and project levels.

## **ROBUST PROJECT MANAGEMENT PRACTICES**

We help you implementing robust project management practices from day one as to improve the chances of delivering a project on time and on budget. More than “on time” and “on budget,” B1-AKT also help organizations deliver projects “on mission” in accordance with their goals, values and culture by encouraging innovation and by facilitating teamwork and collaboration.

To remain competitive, companies are establishing inventive, but also complex, organizational communities. These alliances may be with strategic suppliers, networks of customers, and win-win-win partnerships with key political groups, regulatory entities and other stakeholders.

Through these inventive alliances, which manifest themselves in both physical and virtual models, organizations are addressing the pressures of unprecedented change, global competition, time-to-market compression, rapidly changing technologies, and increasing business and technological complexity.

Applying the appropriate team management techniques to multiple parties at the right time is a complex endeavor. The project leadership role becomes as much about team leadership and group development, as about project and requirements management.

## **LEADERSHIP WHEN IT COMES TO COMPLEXITY**

When dealing with grand challenges, the only way we can deal with them is with a project approach. B1-AKT considers that when managing a complex project, you are a *team leader*, not a project manager.

Great teams do not happen by accident. Hard work, planning, and disciplined effort are required to convert a group of great people into a great team.

For complex projects the effort is magnified because multiple large, geographically dispersed, and culturally diverse teams are involved. Leaders of complex projects cease to be project managers and become leaders of teams. Both conventional and adaptive approaches are needed for large, long-duration projects to be successful.

## **FORECASTING SERVICES**

Our Foresight department identifies and studies the strong and weak signals of market evolution, individual and collective behaviors, the evolution of production and consumption systems, the influence of digital and artificial intelligence in order to shape strategic and sustainable response.

Our trend forecasting methodology is based on solid expertise.

### **FOR BUSINESS**

What separates market-leading companies from the rest is their ability to not just read the current market trends but also foresee the future and plan for it.

We develop enterprise-wide predictive analytics to help you see the bigger picture.

We don't just stop at forecasting — B1-AKT develops effective, result-oriented plans, based on hard data, to help you respond to increased demand volatility, improve supply chain visibility, identify risks, and react quickly to unexpected events.

### **FOR UNIVERSITIES**

Institutions are increasingly looking to demonstrate the value of the research they produce. B1-AKT works with universities to implement a strategic engagement programme which demonstrates the value of your research, thereby providing strong impact case studies for the next REF.
